All partners have Prosperity4All in their corporate websites. Partners have coordinated their dissemination efforts and we have tweeted and retweeted the links to the European coverage. The project has joined the ENTELIS network and has been disseminated in other European projects (INLIFE and MobileAGE kick-off meeting). At a European level, the project has been featured in CORDIS website, the Newsletter Digital Agenda for Europe, and in the ICT for Ageing Well Newsletter (September 2015). Partners have coordinated their dissemination efforts and we have tweeted and retweeted the links to the European coverage.

Partners related to end-user's associations have been quite active in their dissemination. Partner AGE has featured different P4A's aspects in their newsletter and Guadalinfo has covered in their digital outlets the Prosperity4all networking events they have organized. Fundación ONCE has also featured P4A in their 2016 annual report. Additionally, PEAT Talks interviewed Dr Vanderheiden to talk about the GPII and the Prosperity4All project. Additionally, other users have mentioned the Prosperity4All Project in their social media channels (i.e. Twitter) or websites, mostly as a consequence of project's presentations in congresses and events.

And last, but not least, two students from a technical school have worked with Lifetool partner on the Clinician Custom Solution Development Environment.

CH06: One to one meetings and networking events .

During the project's lifecycle, partners hold a series of meetings with different target audiences to disseminate Prosperity4All outcomes and activities. The objectives of the one-to-one meetings and the assistance to networking events is, on one side, to communicate the project's information, and on the other, to establish long-term relation with potential users and partners, to engage them. Project partners' have organized different kinds of events: a gathering to collect and share best practices in Gamification through various projects, workshops related to P4A latest outcomes, workshops on accessibility with teenagers.
