| Status | Final |
| Dissemination Level | Public |
| Delivery Date | 23/03/2015 |
| Number of Pages | 3 |

Project website

The Prosperity4all website was designed and launched by M3. It is available at: <http://www.prosperity4all.eu>. The project website serves as a place where all the information on the project and its main findings are made available to the general public. The dissemination activities, upcoming events, and outcomes from the Prosperity4all project including publications, deliverables and dissemination material, are and will be available through the website. The project website is the main online outlet for the general public documents. It includes both, static information such as an overview of the project (objectives, Consortium, contact, etc.) and access to the resulting deliverables, and dynamic information such as **regularly** updated news and related events. The website also provides links to the project's social accounts in youtube, twitter and linkedin. Additionally the website also has a private area where authorized users can obtain access to restricted documents prior authentication.

The project website conforms to Conformance Level “AA” of the W3C-WAI WCAG 2.0 (Web Content Accessibility Guidelines). In addition it was created using on a new form of WordPress template designed by a Prosperity4All partner (IDRC), that allows any user to adapt the interface to adapt to their specific needs and preferences.

To ensure proper evaluation of the website visits and type of viewers, Google Analytics has been integrated (M9) to track the site, with the objective to increase the number of visits. It will also be helpful to pay special attention to the most visited content and help direct and revise the project’s communication messages. The most visited content (M9-M12) has been the About section followed by the Outcomes section where the latest project’s materials are can be found.
